-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5, drawn to a method of providing a reminder, classified in class 340, subclass 686.1.
  - II. Claims 6-14, drawn to an architecture structure, classified in class 370, subclass 338.
  - III. Claims 15-16, drawn to a terminal device, classified in class 719, subclass 318.
  - IV. Claims 17-18, drawn to a network element, classified in class 709, subclass 223.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method of providing a reminder not using the architecture structure of II, the terminal device of III or the network element of IV; invention II has separate utility such as an architecture structure not using the method of providing a reminder of I, the terminal device of III or the network element of IV; invention III has separate utility such as a terminal device not using the method of providing a reminder of I, the architecture structure of II, or the network element of IV; invention IV has separate utility such as a

network element not using the method of providing a reminder of I, the architecture structure of II, or the terminal device of III. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
